Experience

Ministerio de Hacienda y Economía, DevOps Engineer

- *Optimized CI/CD Pipelines:* Replaced monolithic workflows with Jenkins and Docker, significantly reducing deployment times and resource costs.
- *Cross-Functional Collaboration:* Led alignment between Dev and Infrastructure teams to standardize engineering practices and automated delivery.
- *Cultural Transformation:* Spearheaded DevOps adoption through technical workshops and internal tools that reduced bureaucratic dependencies.
- *Custom Automation:* Engineered specialized scripts and tools to automate repetitive tasks, improving system oversight and team productivity.
